

Happy Birthday!

# Keep Your Candle Burning

## Have you scheduled your colonoscopy?

You've reached the milestone in which colon cancer becomes more prevalent, and therefore regular screening becomes necessary. Colon cancer is one of the most detectable and treatable forms of cancer, and more than **90% of all cases can be prevented** with recommended screening and early detection.

I want to celebrate many more birthdays with you. So please, talk to your doctor today about scheduling a colonoscopy.
