Preparing the Camera

**Attaching the camera strap and lens cap**

1. Attach the strap to the other eyelet in the same manner.

2. Pull the strap tight so that it does not come loose.

3. Inserting the battery

4. Slide the battery/card compartment lock from ( ) to ( ) and ensure that the battery/card compartment cover is securely locked ( ). Failure to do so may cause the battery/card compartment cover to open during shooting and the batteries to fall out, resulting in loss of image data.

5. For the types of batteries that can be used, see “Battery” (p. 66). If using rechargeable batteries, charge the batteries.

- Battery/card compartment lock
Turn off the camera before opening the battery/card compartment cover.

When using the camera, be sure to close and lock the battery/card compartment cover.

**When to replace the batteries**

Replace the batteries when the error message shown below appears.

**Setting up using the supplied CD**

Connect the camera to the computer for set up using the supplied CD.

- User registration using the supplied CD and installation of ib computer software is available on Windows computers only.
- We recommend that you use a computer equipped with Windows XP (Service Pack 2 or later), Windows Vista, or Windows 7.

**Windows**

1. Insert the supplied CD in a CD-ROM drive.

   **Windows XP**
   - A “Setup” dialog will be displayed.

   **Windows Vista/Windows 7**
   - An Autorun dialog will be displayed. Click “OLYMPUS Setup” to display the “Setup” dialog.

   ![Setup dialog](image)

If the “Setup” dialog is not displayed, select “My Computer” (Windows XP) or “Computer” (Windows Vista/Windows 7) from the start menu. Double-click the CD-ROM (OLYMPUS Setup) icon to open the “OLYMPUS Setup” window and then double-click “Launcher.exe”.

If a “User Account Control” dialog is displayed, click “Yes” or “Continue”.

2. Follow the on-screen instructions on your computer.

   If nothing is displayed on the camera screen even after connecting the camera to the computer, the battery may be exhausted. In this case, disconnect the camera, and reconnect after replacing the battery with a new one.
Connecting the camera
Open the connector cover in the direction of the arrow.

USB cable (supplied)

Multi-connector

3 Register your Olympus product.
- Click the “Registration” button and follow the on-screen instructions.

4 Install OLYMPUS Viewer 2 and ib computer software.
- Check the system requirements before beginning installation.
- Click the “OLYMPUS Viewer 2” or “OLYMPUS ib” button and follow the on-screen instructions to install the software.

Inserting an SD/SDHC/SDXC memory card or Eye-Fi card (commercially available)

Always use SD/SDHC/SDXC memory cards or Eye-Fi cards with this camera. Do not insert other types of card.

The camera can shoot and store images using its internal memory, without using an SD/SDHC/SDXC memory card or Eye-Fi card.

The illustrations of the following procedure show the SD memory card.

1. Insert the card straight until it clicks into place.
2. Do not touch the contact area directly.

To remove the SD/SDHC/SDXC memory card and Eye-Fi card

Press the card in until it clicks and comes out slightly, then remove the card.

Shooting, Playback, and Erasing

Shooting with the optimum aperture value and shutter speed (P mode)

In this mode, automatic shooting settings are activated while also allowing changes to a wide range of other shooting menu functions, such as exposure compensation, white balance, etc. as needed.

1. Remove the lens cap.

2. Press the ON/OFF button to turn on the camera.

3. Hold the camera and compose the shot.

4. Press the ON/OFF button again to turn off the camera.

1. If P mode is not displayed, press \( \triangleleft \) to display the function menu screen and then set the shooting mode to P. “Using the Menu” (p. 5)

2. When holding the camera, take care not to cover the flash with your fingers, etc.
4 Press the shutter button halfway down to focus on the subject.
- When the camera focuses on the subject, the exposure is locked (shutter speed and aperture value are displayed), and the AF target mark changes to green.
- The camera was unable to focus if the AF target mark flashes red. Try focusing again.

To view images during shooting
Pressing the button enables playback of images. To return to shooting, either press the button or press the shutter button halfway down.

Shooting movies

1 Press the movie record button to start recording.

2 Press the movie record button again to stop recording.

Effects for the selected shooting mode can be used when shooting movies (when set to mode, 3D mode, [Beauty] in SCN mode, or [Fish Eye] or [Sparkle] in MAGIC mode, shooting is performed in P mode).

Sound will also be recorded.

During sound recording, only the digital zoom can be used. To record a movie with optical zoom, set [Movie sound recording] (p. 43) to [Off].

5 To take the picture, gently press the shutter button all the way down while being careful not to shake the camera.

In the ISO setting, although smaller values result in less sensitivity, sharp images can be taken under fully lit conditions. Larger values result in higher sensitivity, and images can be taken at fast shutter speeds even under low light conditions. However, high sensitivity introduces noise into the resulting picture, which may give it a grainy appearance.

Adjusting the CCD and the image processing function [Pixel Mapping]

This function has already been adjusted at factory shipping, and no adjustment is needed right after purchase. Approximately once a year is recommended.

For best results, wait at least one minute after taking or viewing pictures before performing pixel mapping. If the camera is turned off during pixel mapping, be sure to perform it again.

To adjust the CCD and the image processing function
Press the \( \text{\textcircled{}} \) button when [Start] (Submenu 2) is displayed.

- The camera checks and adjusts the CCD and the image processing function at the same time.

The factory default settings differ according to the region where the camera is sold.
To play back camera images on a TV

- Connection via AV cable
  1. Use the camera to select the same video signal system as the one of connected TV ([NTSC]/[PAL]).
  2. Connect the TV and camera.

- Connection via HDMI cable
  1. On the camera, select the digital signal format that will be connected ([480p/576p]/[720p]/[1080i]).
  2. Connect the TV and camera.

⚠️ When set to [1080i], 1080i format takes priority for HDMI output. However, if this setting does not match the input setting of the TV, the signal format is changed first to 720p and then to 480p/576p. For details on changing the input setting of the TV, refer to the TV’s instruction manual.

⚠️ When the camera is connected to the computer by the USB cable, do not connect the HDMI cable to the camera.

⚠️ Use an HDMI cable that matches the HDMI micro connector on the camera and the HDMI connector on the TV.

⚠️ When the camera and TV are connected by both an AV cable and an HDMI cable, the HDMI cable will take priority.
3 Turn on the TV, and change “INPUT” to “VIDEO (an input jack connected to the camera).”

For details on changing the input source of the TV, refer to the TV’s instruction manual.

4 Turn on the camera, and use < or > to select the image for playback.

Depending on the TV’s settings, the displayed images and information may become cropped.

To operate images with the TV remote control

1 Set [HDMI Control] to [On], and turn off the camera.

2 Connect the camera and TV with an HDMI cable. “Connection via HDMI cable” (p. 52)

3 First turn on the TV, and then turn on the camera.

- Operate by following the operation guide that is displayed on the TV.

With some TVs, operations cannot be performed with the TV remote control even though the operation guide is displayed on the screen.

If operations cannot be performed with the TV remote control, set [HDMI Control] to [Off] and operate using the camera.

Printing

Direct printing (PictBridge™)

By connecting the camera to a PictBridge-compatible printer, you can print images directly without using a computer.

To find out if your printer supports PictBridge, refer to the printer’s instruction manual.

*1 PictBridge is a standard for connecting digital cameras and printers of different makers and printing out pictures directly.

The printing modes, paper sizes, and other parameters that can be set with the camera vary depending on the printer that is used. For details, refer to the printer’s instruction manual.

For details on the available paper types, loading paper, and installing ink cassettes, refer to the printer’s instruction manual.

Print Reservations (DPOF*)

In print reservations, the number of prints and date imprint option are saved in the image on the card. This enables easy printing at a printer or print shop supporting DPOF by using only the print reservations on the card without a computer or a camera.

* DPOF is a standard for storing automatic printout information from digital cameras.
Print reservations can be set only for the images stored on the card.

DPOF reservations set by another DPOF device cannot be changed by this camera. Make changes using the original device. Making new DPOF reservations with this camera will erase the reservations made by the other device.

DPOF print reservations can be made for up to 999 images per card.

Usage Tips

If the camera does not work as intended, or if an error message is displayed on the screen, and you are unsure of what to do, refer to the information below to fix the problem(s).

Troubleshooting

Battery

“The camera does not work even when batteries are installed”.

- Insert new or recharged batteries in the correct direction.
  “Inserting the battery” (p. 13)
- Battery performance may have been reduced temporarily due to low temperature. Take the batteries out of the camera, and warm them by putting them in your pocket for a while.

Card/Internal memory

“An error message is displayed”.

“Error message” (p. 62)

Shutter button

“No picture is taken when the shutter button is pressed”.

- Cancel sleep mode.
  To save battery power, the camera automatically goes into sleep mode and the monitor turns off if there is no operation for 3 minutes when the camera is turned on. No picture is taken even if the shutter button is fully pressed in this mode. Operate the zoom lever or other buttons to restore the camera from sleep mode before taking a picture. If the camera is left for another 12 minutes, it automatically turns off. Press the ON/OFF button to turn the camera on.
- Press the button to switch to the shooting mode.
- Wait until (flash charge) stops blinking before taking pictures.

- With prolonged camera use, the internal temperature may increase, resulting in automatic shutdown. If this occurs, remove the battery from the camera and wait until the camera has sufficiently cooled. The camera’s external temperature may also increase during use, however this is normal and does not indicate malfunction.

Monitor

“Difficult to see”.

- Condensation may have occurred. Turn off the power, and wait for the camera body to become acclimated to the surrounding temperature and dry out before taking pictures.
  “Dew drops can form in the camera when it is suddenly taken from a cold location into a warm, humid room.

“Vertical lines appear on the screen”.

- This condition may occur when the camera is pointed at an extremely bright subject under a clear sky and so on. The lines do not appear, however, in the final image.

“The light is caught in the picture”.

- Shooting with flash results in an image with many flash reflections on dust in the air.

Date and time function

“Date and time settings return to the default setting”.

- If the batteries are removed and left out of the camera for about 3 days, the date and time settings return to the default setting, and must be reset.
  “The time until the date and time settings return to the default setting varies depending on how long the batteries have been loaded.
  “Date, time, time zone, and language” (p. 16)

Miscellaneous

“The camera makes a noise when taking pictures”.

- The camera may activate the lens and make a noise even if no operation is performed. This is because the camera automatically performs actions of auto focus as far as it is ready to shoot.

  After focusing on an object at the same distance as the subject, compose the shot, and take the picture.
  Pressing the shutter button halfway (p. 20)
- **Set [AF Mode] (p. 40) to [Face/iESP]**
- **Taking a picture in [AF Tracking] mode (p. 40)**
  The camera tracks the subject movement automatically to focus on it continuously.
- **Taking a picture of a shadowy subject**
  Using the AF illuminator makes focusing easier.
- **Taking a picture of subjects where autofocus is difficult**
  In the following cases, after focusing on an object (by pressing the shutter button halfway down) with high contrast at the same distance as the subject, compose the shot, and take the picture.

  - [Object with no vertical lines](#)
  - [When objects are at different distances](#)
  - [Fast-moving object](#)
  - [The subject is not in the center of the frame](#)
  - [Subjects with low contrast](#)
  - [When extremely bright objects appear in the center of the screen](#)

---

*1* It is also effective to compose the shot by holding the camera vertically to focus, and then returning to the horizontal position to take the picture.
Camera shake

“Taking pictures without camera shake”

- **Taking pictures using [Image Stabilizer]** (p. 41)
  When a picture is taken of a shadowy subject, the CCD*1 shifts to correct for camera shake even if the ISO speed is not increased. This function is also effective when taking pictures at a high zoom magnification.

  *1 A device that takes light received through the lens and converts it into electric signals.

- **Shooting movies using [IS Movie Mode]** (p. 41)
- **Select [Sport]** in the scene mode (p. 29)
  The [Sport] mode uses a fast shutter speed and can reduce the blur incurred by a moving subject.

- **Taking pictures at a high ISO sensitivity**
  If a high ISO sensitivity is selected, pictures can be taken at a high shutter speed even at locations where a flash cannot be used.

  “Selecting the ISO sensitivity” (p. 37)

Exposure (brightness)

“Taking pictures with the right brightness”

- **Taking pictures of a subject against a backlight**
  Faces or backgrounds are bright even when shot against backlight.
  [Shadow Adjust] (p. 40)

- **Taking pictures using [Face/iESP]** (p. 40)
  Appropriate exposure is obtained for a face against backlight, and the face is brightened.

- **Taking pictures using [ ] for [ESP/ ]** (p. 40)
  Brightness is matched with a subject in the center of the screen and the image is not affected by background light.

- **Taking pictures using [Fill In]** (p. 34) flash
  A subject against backlight is brightened.

- **Taking pictures of a white beach or snow scene**
  Set the mode to [Beach & Snow] (p. 29)

- **Taking pictures using exposure compensation** (p. 36)
  Adjust the brightness while viewing the screen for taking the picture. Normally, taking pictures of white subjects (such as snow) results in images that are darker than the actual subject. Use the exposure compensation to adjust in the positive (+) direction to express whites as they appear. When taking pictures of black subjects, on the other hand, it is effective to adjust in the negative (-) direction.

Color hue

“Taking pictures with colors at the same shade as they appear”

- **Taking pictures by selecting white balance** (p. 36)
  Best results in most environments can normally be obtained with the [WB Auto] setting, but for some subjects, you should try experimenting with different settings. (This is especially true for sunshade under a clear sky, mixed natural and artificial light settings, and so on.)

Image quality

“Taking sharper pictures”

- **Taking pictures with the optical zoom**
  Avoid using digital zoom (p. 41) to take pictures.

- **Taking pictures at a low ISO sensitivity**
  If the picture is taken with a high ISO sensitivity, noise (small colored spots and color unevenness that were not in the original image) can occur, and the image can appear grainy.

  “Selecting the ISO sensitivity” (p. 37)
Panorama

“Taking pictures so that the frames are stitched smoothly”
- A tip for panoramic shooting
  Taking pictures by pivoting with the camera at the center prevents shifting of the image. When taking pictures of close objects in particular, pivoting with the lens end at the center produces favorable results.

Batteries

“Making batteries last longer”
- Avoid any of the following operations when not actually taking pictures because they deplete the battery power
  - Repeatedly pressing the shutter button halfway.
  - Repeatedly using the zoom.
- Set [Power Save] (p. 53) to [On]

Playback/Editing tips

Playback

“Playing images in the internal memory and card”
- Remove the card and display the images in internal memory
  - “Inserting the battery” (p. 13), “Inserting an SD/SDHC/SDXC memory card or Eye-Fi card (commercially available)” (p. 18)

“Viewing images with high picture quality on a high-definition TV”
- Connect the camera to the TV using an HDMI cable (sold separately)
  - “Playing back images on a TV” (p. 51)

Editing

“Erasing the sound recorded to a still image”
- Record over the sound with silence when playing back the image
  - “Adding sound to still images [R]” (p. 45)
**Camera care**

**Exterior**
- Wipe gently with a soft cloth. If the camera is very dirty, soak the cloth in mild soapy water and wring well. Wipe the camera with the damp cloth and then dry it with a dry cloth. If you have used the camera at the beach, use a cloth soaked in clean water and wrung well.

**Monitor**
- Wipe gently with a soft cloth.

**Lens**
- Blow dust off the lens with a commercial blower, then wipe gently with a lens cleaner.

**Storage**
- When storing the camera for extended periods, remove the battery, USB-AC adapter (sold separately) and card, and keep in a cool, dry place that is well ventilated.
- Periodically insert the battery and test the camera functions.

**Battery**
- In addition to the batteries provided with the camera, the following types of battery can be used. Choose the power source best suited to the situation.

**AA alkaline batteries**
The number of pictures that you can take may vary considerably depending on the battery manufacturer and shooting conditions.

**AA NiMH batteries (rechargeable batteries)**
Being rechargeable, Olympus NiMH batteries are reusable and economical. For details, refer to the instruction manual for your charger.

⚠️ Caution:
- There is a risk of explosion if the battery is replaced with the incorrect battery type.
- Dispose of the used battery following the instructions. (p. 74)

**The following types of batteries cannot be used:**
- Lithium battery pack (CR-V3)/AA (R6) manganese (zinc-carbon) batteries/AA (R6) oxyride batteries/AA (R6) lithium batteries
- Power consumption by the camera varies depending on which functions are used.
- During the conditions described below, power is consumed continuously and the battery becomes exhausted quickly.
  - The zoom is used repeatedly.
  - The shutter button is pressed halfway repeatedly in shooting mode, activating the auto focus.
  - A picture is displayed on the monitor for an extended period of time.
  - The camera is connected to a printer.
  - Using an exhausted battery may cause the camera to turn off without displaying the battery level warning.
  - Battery life varies depending on the type of battery, manufacturer, shooting conditions, etc. Similarly, the camera may turn off without displaying the battery level warning or may display the battery level warning more quickly.
**USB-AC adapter (sold separately)**

This camera can be used with a separately sold USB-AC adapter (F-3AC). If using the USB-AC adapter (F-3AC), it must be connected using the USB cable included with the camera. Do not use any other AC adapter with this camera.

The AC cable supplied with the USB-AC adapter (F-3AC) is designed to be used only with the USB-AC adapter (F-3AC). Do not use the AC cable with any other products.

**Using the USB-AC adapter abroad**

- The USB-AC adapter can be used in most home electrical sources within the range of 100 V to 240 V AC (50/60Hz) around the world. However, depending on the country or area you are in, the AC wall outlet may be shaped differently and the USB-AC adapter may require a plug adapter to match the wall outlet. For details, ask at your local electrical shop or travel agent.
- Do not use travel voltage converters as they could damage the USB-AC adapter.

**Eye-Fi card (commercially available)**

- The Eye-Fi card may become hot during use.
- When using an Eye-Fi card, the battery may run out faster.
- When using an Eye-Fi card, the camera may function more slowly.

**Using an SD/SDHC/SDXC memory card or Eye-Fi card (commercially available)**

A card (and internal memory) also corresponds to the film that records images in a film camera. Otherwise, the recorded images (data) can be erased, and retouching is also available with the use of a computer. Cards can be removed from the camera and exchanged, but this is not possible with the internal memory. Use of larger capacity cards enables you to take more pictures.

**SD/SDHC/SDXC memory card write-protect switch**

The SD/SDHC/SDXC memory card body has a write-protect switch. If you set the switch to the “LOCK” side, you will not be able to write to the card, delete data or format. Return the switch to enable writing.

**Cards compatible with this camera**

SD/SDHC/SDXC memory cards and Eye-Fi cards (for compatibility card details, visit the Olympus website.)

**Using a new card**

- Cards must be formatted with this camera before first use or after being used with other cameras or computers. [Memory Format]/[Format] (p. 48)
- When using the Eye-Fi card, read the instruction manual of the Eye-Fi card carefully, and comply with the instructions.
Checking the image saving location

The memory indicator shows whether the internal memory or card is being used during shooting and playback.

Current memory indicator

[Image: A diagram showing the current memory indicator with icons for internal memory ('N') and card ('G').]

- **IN**: Internal memory is being used
- **G**: Card is being used

Readout/recording process of the card

During shooting, the current memory indicator lights up red while the camera is writing data. Never open the battery/card compartment cover or unplug the USB cable. This can not only damage the image data but also render the internal memory or card unusable.

Even if [Memory Format]/[Format], [Erase], [Sel. Image], or [All Erase] is performed, the data in the card is not completely erased. When disposing of the card, damage the card to prevent the disclosure of personal data.
Number of storable pictures (still images)/Continuous recording length (movies) in the internal memory and SD/SDHC/SDXC memory cards

The figures in the following tables are quoted only as a rough guideline. The actual number of storable pictures or continuous recording lengths will differ according to the shooting conditions and memory cards used.

The figures in the table below are the number of the storable pictures when using the internal memory formatted. [Memory Format]/[Format] (p. 48)

**Increasing the number of pictures that can be taken**

Either erase unwanted images, or connect the camera to a computer or other device to save the images, and then erase the images in the internal memory or card. [Erase] (p. 24, 46), [Sel. Image] (p. 47), [All Erase] (p. 47), [Memory Format]/[Format] (p. 48)
SAFETY PRECAUTIONS

CAUTION
RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED OLyMPUS SERVICE PERSONNEL.

An exclamation mark enclosed in a triangle alerts you to important operating and maintenance instructions in the documentation provided with the product.

DANGER If the product is used without observing the information given under this symbol, serious injury or death may result.

WARNING If the product is used without observing the information given under this symbol, injury or death may result.

CAUTION If the product is used without observing the information given under this symbol, minor personal injury, damage to the equipment, or loss of valuable data may result.

WARNING!
TO AVOID THE RISK OF FIRE OR ELECTRICAL SHOCK, NEVER DISASSEMBLE, EXPOSE THIS PRODUCT TO WATER OR OPERATE IN A HIGH HUMIDITY ENVIRONMENT.

General Precautions

Read All Instructions — Before you use the product, read all operating instructions. Save all manuals and documentation for future reference.

Cleaning — Always unplug this product from the wall outlet before cleaning. Use only a damp cloth for cleaning. Never use any type of liquid or aerosol cleaner, or any type of organic solvent to clean this product.

Attachments — For your safety, and to avoid damaging the product, use only accessories recommended by Olympus.

Water and Moisture — For precautions on products with weatherproof designs, read the weatherproofing sections.

Location — To avoid damage to the product, mount the product securely on a stable tripod, stand, or bracket.

Power Source — Connect this product only to the power source described on the product label.

Lightning — If a lightning storm occurs while using an USB-AC adapter, remove it from the wall outlet immediately.

Foreign Objects — To avoid personal injury, never insert a metal object into the product.

Heat — Never use or store this product near any heat source such as a radiator, heat register, stove, or any type of equipment or appliance that generates heat, including stereo amplifiers.

Handling the Camera

WARNING
• Do not use the camera near flammable or explosive gases.
• Do not use the flash and LED (including AF illuminator) on people (infants, small children, etc.) at close range.
• You must be at least 1 m (3 ft.) away from the faces of your subjects. Firing the flash too close to the subject’s eyes could cause a momentary loss of vision.
• Keep young children and infants away from the camera.
• Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
• Becoming entangled in the camera strap, causing strangulation.
• Accidentally swallowing the battery, cards or other small parts.
• Accidentally firing the flash into their own eyes or those of another child.
• Accidentally being injured by the moving parts of the camera.
• Do not look at the sun or strong lights with the camera.
• Do not use or store the camera in dusty or humid places.
• Do not cover the flash with a hand while firing.
• Use SD/SDHC/SDXC memory cards or Eye-Fi cards only. Never use other types of cards.

If you accidently insert another type of card into the camera, contact an authorized distributor or service center. Do not try to remove the card by force.
**CAUTION**
- Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.
- Never remove the batteries with bare hands, which may cause a fire or burn your hands.
- Never hold or operate the camera with wet hands.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
- Doing so may cause parts to deteriorate and, in some circumstances, cause the camera to catch fire. Do not use the charger or USB-AC adapter (sold separately) if it is covered (such as a blanket). This could cause overheating, resulting in fire.
- Handle the camera with care to avoid getting a low-temperature burn.
- When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
  - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
  - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- Be careful with the strap.
  - Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.

**Battery Handling Precautions**

Follow these important guidelines to prevent batteries from leaking, overheating, burning, exploding, or causing electrical shocks or burns.

**DANGER**
- When using NiMH batteries (rechargeable batteries), use only Olympus brand NiMH batteries and the correct charger.
- Never heat or incinerate batteries.
- Take precautions when carrying or storing batteries to prevent them from coming into contact with any metal objects such as jewelry, pins, fasteners, etc.
- Never store batteries where they will be exposed to direct sunlight, or subjected to high temperatures in a hot vehicle, near a heat source, etc.
- To prevent causing battery leaks or damaging their terminals, carefully follow all instructions regarding the use of batteries. Never attempt to disassemble a battery or modify it in any way, solder, etc.
- If battery fluid gets into your eyes, flush your eyes immediately with clear, cold running water and seek medical attention immediately.
- Always store batteries out of the reach of small children. If a child accidentally swallows a battery, seek medical attention immediately.

**WARNING**
- Keep batteries dry at all times.
- To prevent batteries from leaking, overheating, or causing a fire or explosion, use only batteries recommended for use with this product.
- Never mix batteries (old and new batteries, charged and uncharged batteries, batteries of different manufacture or capacity, etc.).
- Never attempt to charge alkaline, lithium battery packs.
- Insert the battery carefully as described in the operating instructions.
- Do not use batteries if their body is not covered by the insulating sheet or if the sheet is torn, as this may cause fluid leaks, fire or injury.

**CAUTION**
- Do not remove batteries immediately after using the camera. Batteries may become hot during prolonged use.
- Always unload the battery from the camera before storing the camera for a long period.
The following AA (R6) batteries cannot be used.

- Batteries whose bodies are only partially or not at all covered by an insulating sheet.

- Batteries whose \( \bigcirc \) terminals are raised, but not covered by an insulating sheet.

- Batteries whose \( \bigcirc \) terminals are flat and not completely covered by an insulating sheet. (Such batteries cannot be used even if the \( \bigcirc \) terminals are partially covered.)

Caution for Usage Environment

- To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  - Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
  - In sandy or dusty environments.
  - Near flammable items or explosives.
  - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  - In places prone to strong vibrations.
  - Never drop the camera or subject it to severe shocks or vibrations.
  - When the camera is mounted on or removed from a tripod, adjust the position of the camera using the tripod head. Do not twist the camera.
  - When carrying the camera, remove all accessories other than genuine Olympus accessories, such as a tripod (sold separately).
  - Do not touch electric contacts on cameras.
  - Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the CCD, or may possibly cause fires.
  - Do not push or pull severely on the lens.
  - Before storing the camera for a long period, remove the batteries. Select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
  - The camera may malfunction if it is used in a location where it is subject to a magnetic/electromagnetic field, radio waves, or high voltage, such as near a TV set, microwave, video game, loud speakers, large monitor unit, TV/radio tower, or transmission towers. In such cases, turn the camera off and on again before further operation.
  - Always observe the operating environment restrictions described in the camera’s manual.

Battery Handling Precautions

- Olympus NiMH batteries (included in some areas) are intended for use only with Olympus digital cameras. Never use these batteries with any other device.
- Always charge NiMH batteries (included in some areas) before using them for the first time, or if they have not been used for a long period.
Always charge sets of batteries (included in some areas) (2 or 4) together.
In some cases, alkaline batteries may have a shorter service life than NiMH. Alkaline battery performance is limited, especially at low temperatures. The use of NiMH batteries is recommended.
AA manganese (Zinc-Carbon) batteries cannot be used with this camera.
When operating the camera with battery power at low temperatures, try to keep the camera and spare batteries as warm as possible. Batteries which run down at low temperatures may be restored after they are warmed at room temperature.
Recommended temperature ranges for NiMH batteries:
Operation 0°C to 40°C (32°F to 104°F)
Charge 0°C to 40°C (32°F to 104°F)
Storage -20°C to 30°C (-4°F to 86°F)
Using, charging or storing the batteries outside these ranges could shorten battery life or affect battery performance. Always unload the batteries from the camera before storing the camera for a long period.
Before using NiMH or NiCd batteries, always read the provided instructions.
The number of pictures you can take may vary depending on the shooting conditions or batteries.
Before going on a long trip, and especially before traveling abroad, purchase an ample supply of extra batteries. The recommended batteries may be difficult to obtain while traveling.
Please recycle batteries to help save our planet's resources. When you throw away dead batteries, be sure to cover their terminals and always observe local laws and regulations.

LCD Monitor

Do not push the monitor forcibly; otherwise the image may become vague, resulting in a playback mode failure or damage to the monitor.
A strip of light may appear on the top/bottom of the monitor, but this is not a malfunction.
When a subject is viewed diagonally in the camera, the edges may appear zigzagged on the monitor. This is not a malfunction; it will be less noticeable in playback mode.
In places subject to low temperatures, the LCD monitor may take a long time to turn on or its color may change temporarily. When using the camera in extremely cold places, it is a good idea to occasionally place it in a warm place. An LCD monitor exhibiting poor performance due to low temperatures will recover in normal temperatures.

The LCD used for the monitor is made with high-precision technology. However, black spots or bright spots of light may appear constantly on the LCD Monitor. Due to its characteristics or the angle at which you are viewing the monitor, the spot may not be uniform in color and brightness. This is not a malfunction.

FCC Notice

Radio and Television Interference

- Changes or modifications not expressly approved by the manufacturer may void the user’s authority to operate this equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
- This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.
- However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Adjust or relocate the receiving antenna.
  - Increase the distance between the camera and receiver.
  - Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
  - Consult your dealer or an experienced radio/TV technician for help. Only the OLYMPUS-supplied USB cable should be used to connect the camera to USB enabled personal computers (PC).

Any unauthorized changes or modifications to this equipment would void the user’s authority to operate it.

Use Only Dedicated Rechargeable Battery, Battery Charger and USB-AC adapter (sold separately)

We strongly recommend that you use only the genuine Olympus dedicated rechargeable battery, battery charger and USB-AC adapter (F-3AC) with this camera. Using a non-genuine rechargeable battery, battery charger and/or USB-AC adapter (F-3AC) may result in fire or personal injury due to leakage, heating, ignition or damage to the battery. Olympus does not assume any liability for accidents or damage that may result from the use of a battery, battery charger and/or USB-AC adapter (F-3AC) that are not genuine Olympus accessories.

OLYMPUS WORLDWIDE LIMITED WARRANTY - IMAGING PRODUCTS

Olympus warrants that the enclosed Olympus® imaging product(s) and related Olympus® accessories (individually a “Product” and collectively the “Products”) will be free from defects in materials and workmanship under normal use and service for a period of one (1) year from the date of purchase. If any Product proves to be defective within the one-year warranty period, the customer must return the defective Product to any of Olympus Service Centers, following the procedure set forth below (See “WHAT TO DO WHEN SERVICE IS NEEDED”).

Olympus, at its sole discretion, will repair, replace, or adjust the defective Product, provided that Olympus investigation and factory inspection disclose that (a) such defect developed under normal and proper use and (b) the Product is covered under this limited warranty.
Repair, replacement, or adjustment of defective Products shall be Olympus’s sole obligation and the customer’s sole remedy hereunder.

The customer is liable and shall pay for shipment of the Products to the Olympus Service Center.

Olympus shall not be obligated to perform preventive maintenance, installation, deinstallation, or maintenance. Olympus reserves the right to (i) use reconditioned, refurbished, and/or serviceable used parts (that meet Olympus’s quality assurance standards) for warranty or any other repairs and (ii) make any internal or external design and/or feature changes on or to its products without any liability to incorporate such changes on or to the Products.

WHAT IS NOT COVERED BY THIS LIMITED WARRANTY

Excluded from this limited warranty and not warranted by Olympus in any fashion, either express, implied, or by statute, are:

(a) products and accessories not manufactured by Olympus and/or not bearing the “OLYMPUS” brand label (the warranty coverage for products and accessories of other manufacturers, which may be distributed by Olympus, is the responsibility of the manufacturers of such products and accessories in accordance with the terms and duration of such manufacturers’ warranties);

(b) any Product which has been disassembled, repaired, tampered with, altered, changed, or modified by persons other than Olympus’s own authorized service personnel unless repair by others is made with the written consent of Olympus;

(c) defects or damage to the Products resulting from wear, tear, misuse, abuse, negligence, sand, liquids, impact, improper storage, nonperformance of scheduled operator and maintenance items, battery leakage, use of non-“OLYMPUS” brand accessories, consumables, or supplies, or use of the Products in combination with non-compatible devices;

(d) software programs;

(e) supplies and consumables (including but not limited to lamps, ink, paper, film, prints, negatives, cables and batteries); and/or

(f) Products which do not contain a validly placed and recorded Olympus serial number, unless they are a model on which Olympus does not place and record serial numbers.

EXCEPT FOR THE LIMITED WARRANTY SET FORTH ABOVE, OLYMPUS MAKES NO AND DISCLAIMS ALL OTHER REPRESENTATIONS, GUARANTRIES, CONDITIONS, AND WARRANTIES CONCERNING THE PRODUCTS, WHETHER DIRECT OR INDIRECT, EXPRESS OR IMPLIED, OR ARISING UNDER ANY STATUTE, ORDINANCE, COMMERCIAL USAGE OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OR REPRESENTATION AS TO THE SUITABILITY, DURABILITY, DESIGN, OPERATION, OR CONDITION OF THE PRODUCTS (OR ANY PART THEREOF) OR THE MERCHANTABILITY OF THE PRODUCTS OR THEIR FITNESS FOR A PARTICULAR PURPOSE, OR RELATING TO THE INFRINGEMENT OF ANY PATENT, COPYRIGHT, OR OTHER PROPRIETARY RIGHT USED OR INCLUDED THEREIN. IF ANY IMPLIED WARRANTIES APPLY AS A MATTER OF LAW, THEY ARE LIMITED IN DURATION TO THE LENGTH OF THIS LIMITED WARRANTY.

SOME STATES MAY NOT RECOGNIZE A DISCLAIMER OR LIMITATION OF WARRANTIES AND/OR LIMITATION OF LIABILITY SO THE ABOVE DISCLAIMERS AND EXCLUSIONS MAY NOT APPLY.

THE CUSTOMER MAY ALSO HAVE DIFFERENT AND/OR ADDITIONAL RIGHTS AND REMEDIES THAT VARY FROM STATE TO STATE.

THE CUSTOMER ACKNOWLEDGES AND AGREES THAT OLYMPUS SHALL NOT BE RESPONSIBLE FOR ANY DAMAGES THAT THE CUSTOMER MAY INCUR FROM DELAYED SHIPMENT, PRODUCT FAILURE, PRODUCT DESIGN, SELECTION, OR PRODUCTION, IMAGE OR DATA LOSS OR IMPAIRMENT OR FROM ANY OTHER CAUSE, WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY) OR OTHERWISE. IN NO EVENT SHALL OLYMPUS BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES OF ANY KIND (INCLUDING WITHOUT LIMITATION LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR DAMAGE.
Representations and warranties made by any person, including but not limited to dealers, representatives, salespersons, or agents of Olympus, which are inconsistent or in conflict with or in addition to the terms of this limited warranty, shall not be binding upon Olympus unless reduced to writing and approved by an expressly authorized officer of Olympus. This limited warranty is the complete and exclusive statement of warranty which Olympus agrees to provide with respect to the Products and it shall supersede all prior and contemporaneous oral or written agreements, understandings, proposals, and communications pertaining to the subject matter hereof. This limited warranty is exclusively for the benefit of the original customer and cannot be transferred or assigned.

WHAT TO DO WHEN SERVICE IS NEEDED
The customer must transfer any image or other data saved on a Product to another image or data storage medium and/or remove any film from the Product prior to sending the Product to Olympus for service.

IN NO EVENT SHALL OLYMPUS BE RESPONSIBLE FOR SAVING, KEEPING OR MAINTAINING ANY IMAGE OR DATA SAVED ON A PRODUCT RECEIVED BY IT FOR SERVICE, OR ON ANY FILM CONTAINED WITHIN A PRODUCT RECEIVED BY IT FOR SERVICE, NOR SHALL OLYMPUS BE RESPONSIBLE FOR ANY DAMAGES IN THE EVENT ANY IMAGE OR DATA IS LOST OR IMPAIRED WHILE SERVICE IS BEING PERFORMED (INCLUDING, WITHOUT LIMITATION, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, LOSS OF PROFITS OR LOSS OF USE), WHETHER OR NOT OLYMPUS SHALL BE OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR IMPAIRMENT.

Package the Product carefully using ample padding material to prevent damage in transit and either deliver it to the Authorized Olympus Dealer that sold you the Product or ship it postage prepaid and insured to any of our Olympus Service Centers. When returning Products for service, your package should include the following:

1. Sales receipt showing date and place of purchase.
2. Copy of this limited warranty bearing the Product serial number corresponding to the serial number on the Product (unless it is a model on which Olympus does not place and record serial numbers).
3. A detailed description of the problem.
4. Sample prints, negatives, digital prints (or files on disk) if available and related to the problem.

When service is completed, the Product will be returned to you postage prepaid.

Provisions of warranty

1 If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during the applicable national warranty period and has been purchased from an authorized Olympus distributor within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under this warranty the customer must take the product before the end of the applicable national warranty period to the dealer where the product was purchased or any other Olympus service station within the business area of Olympus Europa Holding GmbH as stipulated on the website: http://www.olympus.com. During the one year period of the World Wide Guarantee the customer may turn the product in at any Olympus service station. Please notice that not in all countries such Olympus service station exists.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

Provisions of Guarantee

1 “OLYMPUS IMAGING CORP., Shinjuku Monolith, 2-3-1 Nishi-Shinjuku, Shinjuku-ku, Tokyo 163-0914, Japan grants a one year World Wide Guarantee. This worldwide Guarantee must be presented at an Olympus authorized repair service station before any repair can be made under conditions of this Guarantee. This Guarantee is valid only if the Guarantee Certificate and proof of purchase are presented at the Olympus repair service station. Please note that this Guarantee is in addition to and does not affect the customer’s legal warranty rights under the applicable national legislation governing the sale of consumer goods mentioned above.

2 This Guarantee does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the Guarantee period referred to above.

   a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)
   b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.
   c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.
   d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.
   e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.
   f. Any defect that occurs due to exhausted batteries, etc.
   g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.
   h. When the Guarantee Certificate is not returned with the product.
   i. When any alterations whatsoever are made to the Guarantee Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.
   j. When proof of purchase is not presented with this Guarantee Certificate.

3 This Guarantee applies to the product only; the Guarantee does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

4 Olympus’s sole liability under this Guarantee shall be limited to repairing or replacing the product. Any liability under the Guarantee for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect of the product, and in particular any loss or damage caused to any lenses, films, other equipment or accessories used with the product or for any loss resulting from a delay in repair or loss of data, is excluded. Compelling regulations by law remain unaffected by this.
Notes regarding Guarantee maintenance

1 This Guarantee will only be valid if the Guarantee Certificate is duly completed by Olympus or an authorized dealer or other documents contain sufficient proof. Therefore, please make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed or the original invoice or the sales receipt (indicating the dealer’s name, the date of purchase and product type) is attached to this Guarantee Certificate. Olympus reserves the right to refuse free-of-charge service if neither Guarantee Certificate is completed nor the above document is attached or if the information contained in it is incomplete or illegible.

2 Since this Guarantee Certificate will not be re-issued, keep it in a safe place.

For customers in Asia

Provisions of warranty

1 If this product proves to be defective, although it has been used properly (in accordance with the written Handling Care and Operating instructions supplied with it), during a period of up to one year from the date of purchase this product will be repaired, or at Olympus’s option replaced, free of charge. To claim under warranty the customer must take the product and this Warranty certificate before the end of the one year warranty period to the dealer where the product was purchased or any Olympus authorized service station listed in the instructions and request the necessary repairs.

2 The customer shall transport the product to the dealer or Olympus authorized service station at his own risk and shall be responsible for any costs incurred in transporting the product.

3 This warranty does not cover the following and the customer will be required to pay repair charge, even for defects occurring within the one year period referred to above.

a. Any defect that occurs due to mishandling (such as an operation performed that is not mentioned in the Handling Care or other sections of the instructions, etc.)

b. Any defect that occurs due to repair, modification, cleaning, etc. performed by anyone other than Olympus or an Olympus authorized service station.

c. Any defect or damage that occurs due to transport, a fall, shock, etc. after purchase of the product.

d. Any defect or damage that occurs due to fire, earthquake, flood damage, thunderbolt, other natural disasters, environmental pollution and irregular voltage sources.

e. Any defect that occurs due to careless or improper storage (such as keeping the product under conditions of high temperature and humidity, near insect repellents such as naphthalene or harmful drugs, etc.), improper maintenance, etc.

f. Any defect that occurs due to exhausted batteries, etc.

g. Any defect that occurs due to sand, mud, etc. entering the inside of the product casing.

h. When this Warranty Certificate is not returned with the product.

i. When any alterations whatsoever are made to the Warranty Certificate regarding the year, month and date of purchase, the customer’s name, the dealer’s name, and the serial number.

j. When proof of purchase is not presented with this Warranty Certificate.

4 This Warranty applies to the product only; the Warranty does not apply to any other accessory equipment, such as the case, strap, lens cap and batteries.

5 Olympus’ sole liability under this warranty shall be limited to repairing or replacing the product and any liability for indirect or consequential loss or damage of any kind incurred or suffered by the customer due to a defect in the product, and in particular any loss or damage caused to any film or lenses or other equipment or accessories used with the product or for any loss resulting from delay in repair, is excluded.
Notes:
1 This Warranty is in addition to and does not affect the customer’s statutory right.
2 If you have any queries regarding this Warranty, call any of the Olympus authorized service stations listed in the instructions.

Notes regarding warranty maintenance
1 This Warranty will only be valid if the Warranty Certificate is duly completed by Olympus or the dealer. Make sure that your name, the name of the dealer, the serial number and the year, month and date of purchase are all completed.
2 Since this Warranty Certificate will not be re-issued, keep it in a safe place.
3 Any request for repair by a customer in same country where the product was purchased shall be subject to the terms of the warranty issued by the Olympus distributor in that country. Where the local Olympus distributor does not issue a separate warranty or where the customer is not in the country where the product was purchased the terms of this worldwide warranty shall apply.
4 Where applicable, this Warranty is valid worldwide. The Olympus authorized service stations listed in this Warranty will gladly honor it.
* Please refer to the appended list for the authorized international Olympus service network.
